EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed that Mozilla recently released security updates to patch multiple vulnerabilities in its products.

TECHNICAL DETAILS:

Mozilla recently released security updates to address multiple vulnerabilities in Firefox, Firefox ESR, and Thunderbird. These updates addressed several vulnerabilities in their software, some of which could potentially allow attackers to take control of an affected system.

High-Severity vulnerabilities details:

CVE	Description
CVE-2024-1546	Out-of-bounds memory read in networking channels
CVE-2024-1547	Alert dialog could have been spoofed on another site
CVE-2024-1553	Memory safety bugs
CVE-2024-1557	Memory safety bugs

Fixed Versions:

Firefox 123, Firefox ESR 115.8, Thunderbird 115.8

RECOMMENDATIONS:

The UAE Cyber Security Council recommends applying the security updates recently released by Mozilla.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
