## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed a threat actor announced that they will launch the cyber-attack against the UAE, targeting the Ministry of Justice, Ministry of Education and other entities. While the specific details of the attack method remain unknown, it is crucial for organizations to take proactive measures to mitigate potential risks.

## TECHNICAL DETAILS:

Threat Intelligence was notified of a Telegram post where the threat actor named "WAIL\_CRINAL\_213" announced that they will launch the cyber-attack against the UAE, targeting the Ministry of Justice, Ministry of Education and other entities.

## RECOMMENDATIONS:

- Remain vigilant and attentive to any unusual events or actions that may indicate malicious intent.
- Consider anti-DDoS solutions from ISPs or security vendors, if already subscribed then verify the anti-DDoS configuration.
- Notify immediately if any unusual or concerning findings are discovered.
- Implement strong authentication methods, such as multi-factor authentication (MFA), for all critical systems and applications.
- Ensure that all software, operating systems, and security applications are up to date with the latest patches and updates.
- Monitor network traffic for unusual or suspicious activities using intrusion detection systems (IDS) and intrusion prevention systems (IPS).
- Educate employees about the risks of ransomware/malware, how to identify phishing attempts, and safe online behaviour.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
