**Threat Alert Notification- Threat Actor targeting the UAE digital infrastructure**  
Tracking #:432315681  
Date:06-03-2024

## EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed a threat actor announce that they will target the UAE digital infrastructure. While the credibility and specific methods of the threat are unclear, it's crucial for entities to take proactive measures.

## TECHNICAL DETAILS:

Threat Intelligence was notified of a Telegram post where the threat actor named "Dark Storm Team" has announced that they will attack the digital infrastructure of UAE.

### Alert Reference:

## RECOMMENDATIONS:

- Remain vigilant and attentive to any unusual events or actions that may indicate malicious intent.
- Consider anti-DDoS solutions from ISPs or security vendors, if already subscribed then verify the anti-DDoS configuration.
- Notify immediately if any unusual or concerning findings are discovered.
- Implement strong authentication methods, such as multi-factor authentication (MFA), for all critical systems and applications.
- Ensure that all software, operating systems, and security applications are up to date with the latest patches and updates.
- Regularly back up the data and store it in a secure location
- Monitor network traffic for unusual or suspicious activities using intrusion detection systems (IDS) and intrusion prevention systems (IPS).

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
