RECOMMENDATIONS:

- Remain vigilant and attentive to any unusual events or actions that may indicate malicious intent.
- Consider anti-DDoS solutions from ISPs or security vendors, if already subscribed then verify the anti-DDoS configuration.
- Notify immediately if any unusual or concerning findings are discovered.
- Implement strong authentication methods, such as multi-factor authentication (MFA), for all critical systems and applications.
- Ensure that all software, operating systems, and security applications are up to date with the latest patches and updates.
- Regularly back up the data and store it in a secure location
- Monitor network traffic for unusual or suspicious activities using intrusion detection systems (IDS) and intrusion prevention systems (IPS).

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
