EXECUTIVE SUMMARY:

The UAE Cyber Security Council has observed Google recently released security updates to address multiple vulnerabilities in the Chrome browser.

TECHNICAL DETAILS:

On March 12, 2024, Google released security updates to address multiple vulnerabilities in the Chrome browser. These updates addressed three security fixes, including the high-severity CVE-2024-2400 vulnerability reported by external researchers.

High-Severity Vulnerability Details:

- **CVE-2024-2400**
- A use-after-free vulnerability exists in Chrome's Performance Manager. This vulnerability could allow an attacker to execute arbitrary code on an affected system. The vulnerability is due to a use-after-free condition, which can be triggered by a specially crafted request.

Fixed Versions:

Chrome 122.0.6261.128/.129 for Windows and Mac

Chrome 122.0.6261.128 to Linux

Chrome 122 (122.0.6261.119) for Android

RECOMMENDATIONS:

The UAE Cyber Security Council recommends updating Google Chrome to the latest version.

Kindly circulate this information to your subsidiaries and partners as well as share with us any relevant information and findings.

The UAE Cyber Security Council extends its appreciation for the continued collaboration.
